SECURASITE

Who We Are

Contents

Based in the West Midlands – the heart of manufacturing in the UK – Securasite manufactures our own temporary fencing range and barriers.

When UK manufacturing has never been so important, our unique process of using both autonomous robots and a team of qualified welders produces high quality products at scale like never before.

We can deliver direct anywhere in the UK on your behalf, with white label deliveries also available on request. You can select stock items from our Midland, Northern and Southern depots.

We also specialise in powder coated and bespoke barriers and can deliver small volumes fast.

The catalogue shows the range of our everyday products, but whatever your temporary fencing requirements are, get in touch today to discuss in more detail.

Pedestrian Barrier Fixed Leg

The Securasite Pedestrian Crowd Barriers are easy to install and highly durable.

With a 5mm wire insert and wrap around connector, it's a lightweight offering still fully compatible with other products on the market. Possibly a more cost effective option as a no frills version of our HD fixed leg barrier.

They are ideal for construction and civil sites.

Features

Rigid footing

Wrap around connectors

Specification:

Length	2300mm
Width (feet)	460mm
Height	1100mm
Weight	9kg
Material	Steel

See Page 7 for Pedestrian

Bespoke Solutions and Branding

We can brand up any of our barrier range to match your requirements.

All our fencing and barriers are available in 7 different RAL colours as standard. However, we can also offer powder coating to any RAL number you need to match branding or an existing colour.

Case Study - Wolverhampton Wanderers F.C.

Problem: Required a way of controlling crowds and VIP player viewing area, however needed a temporary solution that could be assembled and disassembled after the relatively short time the fans and football stars we're together.

Solution: Choose our temporary barrier and walkthrough solution because of the quality of build and the bespoke finishes in terms of powder coating in corporate colours with the ability to add name plates branded with the Wolves logo.

Results: A striking temporary segregation solution, that keeps both the fans and the football stars safe, whilst promoting the club's brand.

Additional Branding Options:

Name plates and branded stickers for the name plates are also available, on request.

Metal name plate 135x100mm (LxH)

Metal name plate 270x110mm (LxH)

Metal name plate 420x420mm (LxH)

Branded sticker laminated finish 80x90mm (LxH)

Branded sticker laminated finish 250x80mm (LxH)

Branded sticker laminated finish 400x400mm (LxH)

Product Codes

ST-250-80	Brand sticker 250x80mm
ST-400-400	Brand sticker 400x400mm

Police Crowd Control Barrier

The Securasite Police Barriers are made with safety in mind.

Securasite's Police Barriers are manufactured with safety in mind - they are built to withstand the most demanding environments.

Ideal for high security areas and has a base structure designed to prevent sliding.

The mesh infill makes the barrier much harder to reach through and increases the amount of damage the barrier can take before it becomes unusable. The base is specifically designed for these barriers and provides an incredibly stable platform for your barrier.

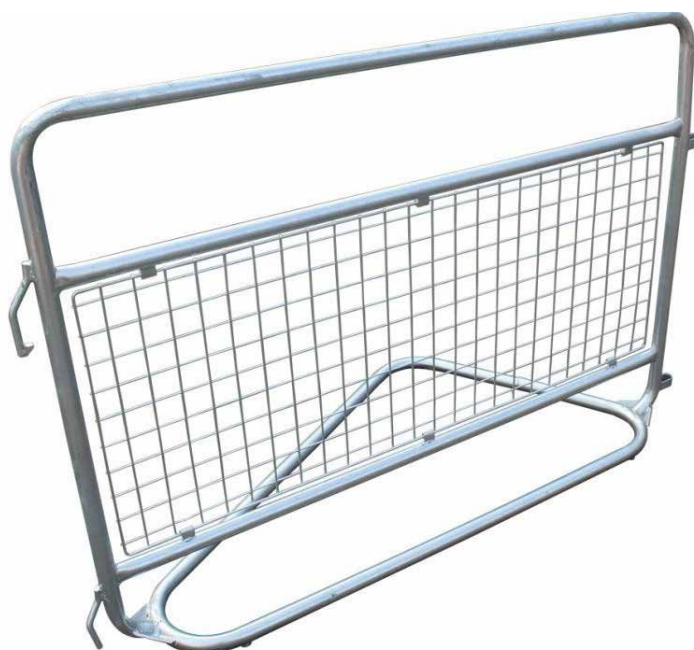

This barrier has a unique interlocking system that makes it impossible to dismantle your barriers in any way except by starting from one end and working your way to the other. This prevents people from removing barriers from the middle sections.

Features

Hook and eye connections

Available with
mesh cover

Specification:

Length	1540mm
Width	70mm
Height	1070mm
Weight	26kg
Material	Galvanised Steel

Product Code

PB-15-EV-001-HDG

Police Crowd Control Barrier Pedestrian & Vehicle Gate

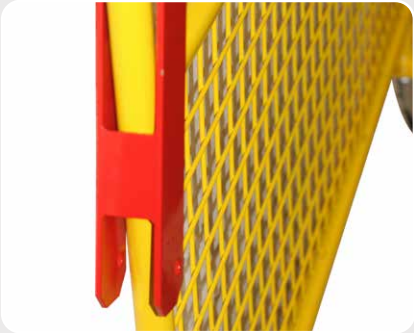

Provides an instant and high quality method of crowd management access.

Securasite's pedestrian and vehicle gates offer an entrance point and interlock with our control barriers. The gate has wheels and a hinge bar so it can be pivoted for easy access.

Can be powder coated to any colour

Features

Interlocking bar

Wheels for easy access

Temporary Fencing - Heavy Duty Round Top Infinity Panel

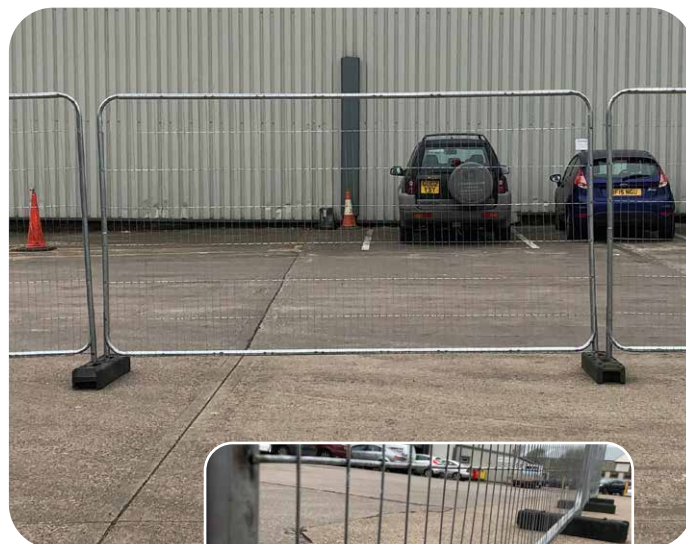

The Securasite Temporary Fencing is perfect for safety on construction sites.

Heavy Duty Securasite fencing or Temporary Fencing Panels are designed to provide the ultimate site security. They're easy to assemble design which means they're an excellent investment for keeping your site safe. The products versatile nature makes them perfect for several situations. Ranging from construction sites, outdoor events and private spaces.

Manufactured from pre-galvanised steel, these panels come at a height of 2025mm and a length of 2500mm.

The panel's sheeting infill helps to make it wind resistant as air can flow through it freely, ensuring that it won't collapse with the stabilisers' help - see pages 29-30.

Temporary fencing is connected with couplers or anti-tamper couplers if you require more security and standard or high visibility temporary fencing feet.

Pedestrian Gates - Round Top

The Securasite Pedestrian Gates are quick and easy to assemble.

To use with temporary fencing panels to create a gateway between sectioned areas.

Quick and easy to assemble the Pedestrian Gate slots into the temporary fencing blocks, and then clips together onto the fencing panels to create a strong structure.

Standing at 2000mm high and with a width of 1150mm, these pedestrian gates have been designed for use with both square and round top temporary fencing to create a point of access for staff and visitors to your site.

Constructed from high-quality galvanised steel, these gates have been designed to last and are used again and again.

Each kit comes with a castor wheel, to provide a smooth opening and closing action as well as an additional post, which allows the gate to be secured closed with the use of the sliding latch bolt.

When not in use, the gate can be secured closed with the use of the sliding latch, which can be then locked with a padlock (sold separately).

Installation of these gates into a temporary fencing system is quick and easy, requiring either standard or tamper-proof couplers and concrete or thermoplastic feet.

We supply a wide range of temporary fencing panels, gates, and accessories to create a strong, stable, and secure short to the mid-term perimeter for your site.

Specification:

- Access for pedestrians on site
- 2000mm (H) x 1150 (W)
- Weight: 15kg
- Quick & Easy to assemble
- Constructed from high-quality galvanised steel

Product Code

TF-11-PG-001-PGA

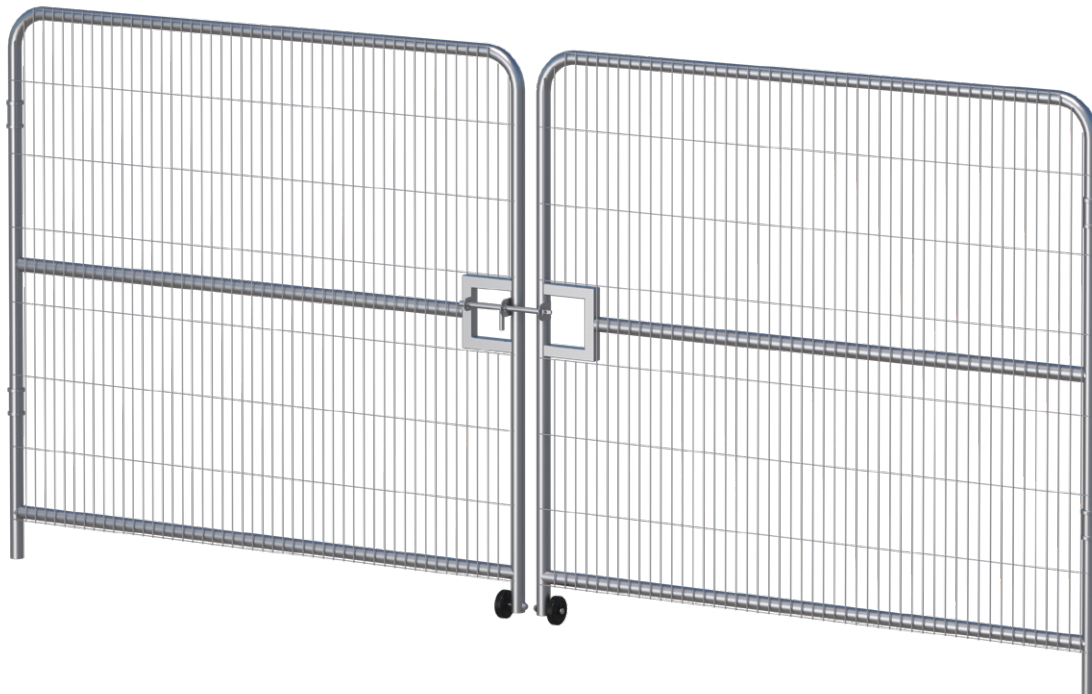

Vehicle Access Gates

The Securasite Vehicle Access Gate are durable and built for security.

Achieving easy vehicle access to temporary construction sites can present security problems, but Securasite Vehicle Gates offer the perfect solution with fully galvanised and weatherproof steel frames to keep your site under tight control.

Securasite vehicle gates come complete with castor wheels and latch, to provide simple access to any site.

Measuring 4 metres wide by 2 metres high, and made from galvanised steel, these vehicle gates provide convenience to any workplace.

Specification:

- Temporary access gates for vehicles on site
- Compatible with temporary fencing and hoarding
- 2000mm (H) x 4200mm (W)
- Weight: 32kg
- Durable frame
- Wind resistant

Product Code

TF-42-VG-001-PGA

Steel Hoarding

The Securasite Site Hoarding are robust for security and safety.

Galvanised Steel Hoarding panels are essential for site security and safety. Their robust design offers maximum strength and the box profile sheet finish allows for full privacy.

Fence & Scaffold Sheeting

For site privacy, noise control and custom branding for temporary fencing.

Securasite sheeting is a leading range of weather protection and containment material suitable for installation on temporary fencing panels to provide improved screening and enhanced site security. The vented, sheet, acoustic and mesh materials provide an excellent base for flexographic (repeat logo) and wide-format digital custom printing. Securasite perimeter fencing solutions offer exciting opportunities for corporate branding, promotion and advertising.

Vented sheeting

Securasite Vented Sheeting is a robust open-mesh netting, which allows some passage of air, reducing wind forces on the fencing. Both flame-retardant and non flame-retardant versions are available.

PVC Banners

Securasite PVC Banners are dip coated PVC mesh and coated reinforced PVC. All provide an excellent surface for repeat logo printing or high impact digital graphics. Flame retardant. Sizes to order.

Air Mesh

Securasite Air Mesh is a closely woven air permeable mesh that offers a superior surface for all printing options. Two standard sizes and other sizes to order.

Acoustic sheeting

Securasite Sound Barrier consists of a PVC outer layer and a dense inner foam. This sheeting provides significant noise reduction at noise-sensitive sites. Available either as 10m-long rolls or as panels.

In-House Design and Print Facilities

Securasite perimeter fencing materials are printed in-house, with artwork prepared by our design team.

- Quick turnaround times
- Cost saving benefits
- No minimum order for DigiPrint
- Flexible branding options
